Statistical Register of South Australia, 1948-1949

PREFACE.

The Statistical Register is divided into five parts as follows:—

- Part I.—Social—Administration, Justice, Education, Hospitals, Charities, etc.
- II.—Population and Vital
- III.—Finance—State, Local Government, Banking, etc.
- IV.—Trade, Transport and Communication.
- V.—Production

A Statistical Summary of South Australia for the years 1836 to date inclusive is attached at the end of the volume.

Since in most cases considerations of space do not permit of a verbal analysis of the figures, it has been necessary in certain tables to append explanatory notes at the bottom of the page. Careful attention is drawn to these notes since they will generally be of considerable assistance in interpreting the published figures.

Certain more detailed information is shown in other departmental reports, such as Budget Papers and Reports of the Education, Police, Hospitals, etc., Departments.

My thanks are tendered to the various heads of State and Commonwealth Departments for their co-operation in furnishing statistical data, often at considerable inconvenience.

I desire also to express my appreciation of the services of Mr. H. L. Semmens, Assistant Government Statist, and of the staff of compilers and other officers for their careful attention to intricate details in the compilation of the various sections of this volume.

18th August, 1951. A. W. BOWDEN, Government Statist, etc.

* Classification numbers and diseases as per 1929 International Classification which was used up to 1939, and as per 1938 classification, which has been used from 1940 on, are shown. In some cases, definite comparisons cannot be made, and even where comparisons are shown there are slight variations.

* Includes persons who were (1) unable to secure employment; (2) temporarily laid off from their jobs; and (3) not actively seeking work at the time of the census on account of sickness or accident, industrial dispute, resting between jobs, or for any other reason.

Note.—Wage-earners who were employed part-time in 1933 were asked to indicate that fact on the census schedule in answer to the question regarding occupational status, and all those who so described themselves are included in the work force for that year. In 1947, however, persons working regularly, but for considerably less than normal working hours, were instructed on the census schedule to exclude themselves from the work force unless their earnings from such work formed their principal means of livelihood.

No. 40.—RETURN SHOWING POPULATIONS AND DWELLINGS IN LOCAL GOVERNMENT AREAS CENSUS, 30TH JUNE, 1947. (Preliminary.)

For the purpose of the census a " dwelling " is defined as a collection of rooms occupied by a household group living together as a family unit, whether comprising the whole or only part of a house or other building. In a number of cases where private houses were shared by several family units, only one householder's schedule was returned for the whole of the house, instead of a separate schedule for each portion occupied separately. These are shown in the tables as " Private Houses (shared by several families) " and represent not "occupied dwellings " as defined for census purposes, but "houses " occupied by more than one family. In the case of the remaining private houses shared by more than one family, separate schedules were furnished for each portion occupied, and these portions are shown correctly in the tables as " dwellings " under the heading " Share of Private House." Where the building is part of a house or other building ordinarily intended for occupation by a separate family group, it is shown as a flat (for self-contained dwelling units which can be completely closed off and which include both cooking and bathing facilities), or as a tenement (for all other such dwellings, which generally are rooms with separate cooking facilities). See also the notes at foot of return.

CURRENCY VALUES.

Oversea Imports are recorded in Australian currency, following the 1947 Amendment to the Commonwealth Customs Act, 1901-1936. The full definition is printed at head of table 12. For years prior to 1947-48 they were recorded in British Currency, though strictly speaking they were British currency plus 10 per cent.

Exports are shown in Australian currency, the full definition being printed at head of table 13. (Ships' Stores are shown in table 11 but are excluded from all other returns.)

DIRECT OVERSEA IMPORTS, 1948-49.

(For Alphabetical Index to Items, see page 19.)

No. 12.—Direct Oversea Imports into the State of South Australia for the Year ended 30th June, 1949.

NOTE.—With the exception of Great Britain, New Zealand, and Australia, and in cases where a single country is concerned, only those countries are shown under each article where the value of imports exceeds £100 during any year.

In all cases where an item was not imported during the period, classification number of the item has been omitted from following table.

Value of Imports.—The value of goods imported from countries beyond Australia is recorded in Australian currency and represents the amount on which duty is payable or would be payable if duty were **ad valorem.** Section 154 (1) of the Customs Act, 1901-1948, provides that "when any duty is imposed according to value, the value for duty shall be the sum of the following :—

(a) (I.) The actual money price paid or to be paid for the goods by the Australian importer plus any special deduction ; or
(II.) The current domestic value of the goods, whichever is the higher ;
(b) All charges payable or ordinarily payable for placing the goods free on board at the port of export."

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country".

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit ; where the cental is used, the unit equals 100 pounds avoirdupois. Where imports have been declared in packages without an indication being given of the number, capacity or weight, of the articles imported, the values only have been inserted.

N.E.I. means "Not elsewhere included". **N.E.S.** means "Not elsewhere specified".

Import Duties.—Duties charged on imports into South Australia are collected by the Commonwealth of Australia under various Acts.

DIRECT OVERSEA EXPORTS, 1948-49.

No. 13.—RETURN showing Direct Oversea Exports from the State of South Australia for the Year 1948-49.

(For Alphabetical Index to Items see page 19.)

NOTE.—In all cases where an item was not exported during the year, the classification number of the item has been omitted from the following table.

Value of Exports.—The value of goods exported (including cost of containers) is recorded in Australian currency and the f.o.b. values have been determined as from 1st July, 1937, as follows :—

(1) Goods sold to overseas buyers before export—the f.o.b. equivalent of the price at which the goods were sold (e.g., as regards wool, the actual price paid by the overseas buyer plus the cost of all services incurred by him in placing the wool on board ship).

(2) Goods shipped on consignment.—The Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, the f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

N.E.I means " not elsewhere included."

N.E.S. means " not elsewhere specified."

Exports to Other States.—Goods transferred from South Australia to the other States of the Commonwealth for shipment to oversea countries are shown as exports from the State from which the goods were finally despatched and are not included in the South Australian details.

Ship's Stores.—Goods shipped as " ship's stores " on board overseas ships are not included in exports. See Return No. 13.

* Including scoured wool converted into greasy.

† Excluding £2,592,016 half-share of profits on resale of wool by Imperial Government to which the growers were entitled.

‡ Interstate trade in wool, stocks, and wool used in local factories, are factors which cause differences between figures for oversea export and for actual production.

§ Excluding £2,239,760 being interim share profits of Australian Wool Realization Commission paid November 1949.

NOTE.—In compiling the above tables, the mean rainfall in each agricultural county has been first obtained from all available records within or on the borders of the county, and then weighted by the areas of the country to obtain the mean rainfall for each Division and the State. Counties Hamley and Young (Murray Mallee), Derby, Lytton and Taunton (Upper North), and Manchester, Hore-Ruthven, and York (Western) being non-agricultural counties are excluded in compiling the average rainfall for this return.

(*a*) Gross value is defined as the value placed on recorded production at the wholesale price realized in the principal markets. Where primary products are absorbed at a local point or become raw material for a secondary industry, the value in each case is presumed to be the value at the principal market. Values include Bounties. (*b*) Marketing Costs.—Freight, commission, containers, insurance, etc. (*c*) Local value is gross value less marketing costs, being value at place of production. (*d*) Production costs such as stock feed, petrol, oil, seed costs, seed pickling, manures, spraying, dips, and power and water used in irrigation. (*e*) Production Costs.—Depreciation of machinery and implements (Agricultural, 10 per cent, pastoral and dairying, 5 per cent), and maintenance of buildings and fences (4 per cent on estimated present value of buildings, etc., used for farm or station purposes, excluding residences). (*f*) Net value is local value less production costs. (*g*) Local value is also accepted as net. (*h*) Power, fuel, explosives, timber, etc.

FACTORIES.

NOTE.—The average number of persons employed means the average number over the whole year, except where otherwise specifically stated. Consequently in returns relating to employment and in the computation of average salaries and wages paid, production per employee, etc., the average number for the whole year is used.

From 1940-41, particulars for Electricity and Gas undertakings refer only to generation and exclude, for example, approximately 1,500 hands, £400,000 salaries and wages, and £700,000 value of production for distribution and transmission which were previously included.

NOTE.—Gross value shown in return No. 9 is defined as the value placed on recorded production at the wholesale price realized in the principal markets. Local value excludes marketing costs, freight, commission, containers, etc. Net value also excludes materials used such as stock feed, seed, manures, etc. (thus eliminating duplications), and depreciation (except for factories).

Prior to 1905 average rainfall over agricultural areas was based on the average of 50 selected stations. From 1905 the average is a weighted one, all stations within agricultural counties being averaged and results weighted by the areas to arrive at the State average.

b Highest—1889, 30·87 ; lowest—1914, 11·39 inches.
